## **Special Issue**

# **Environmental Exposure, Risk Assessment and Public Health**

## Message from the Guest Editor

Each day, humans are exposed to toxic chemicals through multiple pathways, e.g., the inhalation of dust, consumption of contaminated drinking water, direct ingestion of soil and consumption of food plants grown in contaminated soil. Understanding the long-term health effects of environmental exposure, their interactions with genetic and epigenetic variants and effective interventions for reducing involuntary exposure to environmental chemicals is fundamental to protecting individual and public health.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
