

## Special Issue

# Sustainable Business Model Innovation, Regeneration, Resilience, and Circular Economy

### Message from the Guest Editors

In recent years, global challenges related to climate change, resource depletion, and increasing social pressures on firms have made it essential to reflect deeply on business models and management strategies oriented toward sustainability. This Special Issue aims to synthesize theoretical and empirical contributions that explore the various dimensions of sustainable business model innovation, with particular attention paid to Mechanisms and practices of business model innovation for sustainability; Approaches to organizational regeneration and resilience in contexts of crisis and transformation; Strategies and tools of the circular economy applied across different industries; Managerial and policy implications to support the transition toward sustainable economic systems. The objective is to stimulate interdisciplinary debate and propose new perspectives capable of enriching the academic literature while providing relevant insights for the professional community and policymakers.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
