Special Issue

3D Printing for Multifunctional Applications and Sustainability

Message from the Guest Editors

- 3D printing, also known as additive manufacturing, has revolutionized the way materials and products are designed, fabricated, and utilized across various industries. With its ability to enable complex geometries, customized designs, and optimized material usage, 3D printing offers immense potential for multifunctional applications while promoting sustainability.
- Aim and Scope
- This Special Issue aims to provide a platform for cutting-edge research and advancements in 3D printing technologies for multifunctional applications with an emphasis on sustainability. The issue invites contributions that investigate material advancements, process optimisations, and innovative applications leveraging the potential of multi-material 3D printing to achieve sustainable engineering solutions. We invite researchers and experts in the field to submit original research articles, reviews and case-studies covering theoretical, experimental, and applied aspects of additive manufacturing for multifunctional and sustainable applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
