

## Special Issue

# Recycled Materials and Infrastructure Sustainability

### Message from the Guest Editors

Recycled and reclaimed highway and construction materials have been used for some time in civil infrastructure. These include among other: recycled asphalt pavement, RAP; recycled concrete aggregate, RCA; fly ash, FA; foundry sand, FS; glass culets; crumb rubber and tire chips; recycled plastics; dredge materials. The current emphasis on the design and construction of “green infrastructure” has generated additional interest in increasing their use for capturing the added sustainability benefits. However, increased amounts of recycled materials in infrastructure applications is often coupled with challenges in meeting performance requirements and standards. Furthermore, proper sustainability assessment tools are required in order to properly quantify the potential benefits in terms of economic and environmental impact...

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
