

Special Issue

Clean Technologies in Food Processing and Waste Management

Message from the Guest Editors

With this Special Issue, "Clean Technologies in Food Processing and Waste Management", we aim to explore, examine and propose clean technologies, as well as efficient management strategies, for the treatment of agroindustrial waste, in order to generate a culture of integral use through the circular economy in food processing systems. For this reason, it is important to verify which are the main waste disposal problems, which processing stages produce waste, how the waste is treated and explore possible alternatives through clean technologies to reduce and/or eliminate agroindustrial waste, revalue it or incorporate it back into the value chain. This Special Issue is specifically dedicated to works related to food processing, clean technologies and the use, management and approach of agroindustrial wastes for their revalorization and integration into the food chain. Based on your expertise and recent publications, we believe that you would provide an excellent contribution.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
