# **Special Issue**

# Advanced Technology and Urgent Issues in Sustainable Energy Integration

## Message from the Guest Editor

This Special Issue focuses on the key technologies of grid-connected sustainable energy, encourages the exchange of various knowledge about the control strategies of renewable and sustainable energy systems, and aims to improve the overall inertia performance of these new energy grid-connected systems, the stability of the fault conditions, and to guarantee the safe and stable operation of new power systems. In this Special Issue, original research articles and reviews are welcome, and research areas may include, but are not limited to:

- planning and operation of sustainable energy integration;
- inertia support for sustainable energy integration;
- stability analysis of the sustainable energy integration;
- fault diagnosis of the sustainable energy equipment;
- advanced control algorithm for sustainable energy integration;
- distribution and scheduling of sustainable energy;
- artificial intelligence applications for sustainable energy integration;
- accurate power prediction of sustainable energy;
- power quality of sustainable energy integration;
- transmission topology of sustainable energy integration.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
