Special Issue

Latest Research on Safety Improvements for Sustainable Transportation Systems

Message from the Guest Editors

With the rapid development of the transportation industry across all the major modes (including road, rail, sea, and air), the number of accidents has significantly increased. Many of these accidents are caused by human factors (e.g., lack of driver attention that causes collisions of roadway vehicles at busy intersections; insufficient experience of ship crew members that causes accidents for the cruise industry; inexperienced pilots taking risky maneuvers during flights). A lack of proper maintenance activities and up-to-date equipment could increase the risk of accidents as well. Some causes of accidents are rather difficult to control (e.g., accidents caused by hurricanes, tsunamis, tornadoes, wildfire, earthquakes, etc.). This Special Issue focuses on the latest research outcomes related to safety improvements for different types of transportation systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
