

Special Issue

Precision Agriculture Techniques for Sustainable Water and Soil Management

Message from the Guest Editors

The scope of this Special Issue is to explore a range of innovative methodologies, technologies, and agricultural equipment, designed to increase productivity, optimize resource management, and chemical inputs utilization in agriculture. This includes precision irrigation systems, AI-based crop treatment equipment, soil monitoring technologies using drones and remote sensing, data analytics for resource management, and sustainable farming practices. The aim is to consolidate cutting-edge research and various practical applications that promote efficiency, sustainability, and environmental protection in agricultural practices. We propose establishing clean agroecosystems that enhance sustainable food production, promote soil health in marginal lands, and protect soils from erosion and landslides. Some non-limiting domain recommendations for the proposed papers are as follows: Integration of IOT and sensor-based technologies in precision agriculture; Production of highly efficient biofertilizers; Applications of artificial intelligence in agriculture; Advanced aquaponic systems; Soil health assessment methods and strategies; Case studies of sustainable farming practices.

Guest Editors

Dr. Iulian Voicea

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
