Emerging Pollutants in Environment: Risk Assessment, Monitoring and Governance

Message from the Guest Editors

The whole world affected by pollution issues in which different class of pollutants affect human health in different ways. However, pollutants are not limited to chemical pollutants, personal care products and pathogens, and there is limited information regarding certain biotoxins. Such pollutants are categorized as emerging pollutants. The more studies that are carried out regarding such pollutants, the more information that will be available for their governance. This Special Issue's main objective is to highlight the most cutting-edge water and wastewater treatment methods, as well as current and future technology for water value enhancement and protection against established and novel contaminants. Recent advancements in all areas of the analysis of contaminants in the environment in terms of their risk assessment, monitoring and governance are covered in this Special Issue. All environmentalist and scientific researchers are cordially welcome to submit cutting-edge reviews, viewpoints, and research publications. The topics of the papers to be submitted to this Special Issue are defined by the keywords presented below.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
