

## Special Issue

# Sustainable Transport and Urban Renewal

### Message from the Guest Editors

Land use and mobility shape our societies through their economic, environmental, and social impacts and are closely intertwined domains, significant societal changes and innovations affect both domains. This Special Issue calls for research that leverages today's technological advancements in transport and urban renewal to address current challenges and opportunities, including economic growth, climate change mitigation and adaptation, well-being, energy efficiency and clean energy, spatial justice, and social equity. Specifically, this Special Issue aims to provide international organisations, governments, municipalities, private companies, citizens, and scholars with valuable insights into how transport and urban planning strategies can contribute to the sustainable development of both urban and rural areas.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
