# Rainwater Harvesting to Improve Agricultural Sustainability in Global Drylands

### Message from the Guest Editors

Drylands cover nearly half of all terrestrial land surfaces. of which 72% are in developing countries and support over a quarter of the global population's living space. They are the main contributor to global food production and a variety of fruit trees. However, water scarcity in drylands greatly constrains agricultural productivity, particularly in undeveloped rural areas where sophisticated irrigation systems are a luxury. Therefore, efficient use of rainwater through rainwater harvesting technologies (RHTs) is an effective avenue to alleviate water stress and improve agricultural productivity, which could contribute to several Sustainable Development Goals such as SDG 2, SDG 6, and SDG 15. We invite multidisciplinary contributions that develop new RHTs and/or improve understanding of the effect and mechanism of RHTs in promoting agricultural sustainability in global drylands.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
