

Special Issue

Re-defining the Role of Transport in Sustainable Tourism Development

Message from the Guest Editors

New tourism and transport infrastructure, new attractions and tourism products have been created, and cultural and natural heritage resources are being increasingly utilized in tourism for local and regional development. All this has created a need to discuss and critically evaluate transport infrastructure, accessibility and other issues linked to growing tourism sectors. We would like to know how transport transforms tourist destinations in contemporary world. We hope that sustainable tourism and sustainable transport to and within tourist destinations could be considered as a new way of thinking and practising tourism. This Special Issue calls for theoretical, methodological, and empirical case studies illustrating the diversity of the role of transport infrastructure in sustainable tourism development, transport and accessibility changes, transitions and formations that influence, guide and control tourism development in different temporal and spatial scales and settings.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
