# **Special Issue**

# Recent Advances in Life Cycle Engineering

## Message from the Guest Editors

Life cycle engineering uses technical and scientific principles to improve the sustainability of products and systems by taking economic, environmental, and social concerns into account in decision making within the life cycle. Solving problems from a life cycle perspective enables researchers, engineers, and managers to innovate in technology, product design, manufacturing, energy, and service systems. Since the concept was introduced in the 1980s, tremendous progress has been made in recent decades. Challenges, however, not only exist in methodologies but also in emerging technologies and changing environments of production and supply chain. This Special Issue aims to collect both original research and/or reviews that contribute to the development of life cycle engineering methodologies. applications of life cycle engineering in product design, manufacturing, energy systems, product service systems, innovations with state-of-the-art technologies to create a circular economy of products and service systems, as well as education innovations and case studies.

# About the Journal

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

Prof. Dr. Marc A. Rosen Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

# **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

## Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
