# Reducing Trade-Offs in Forest Management under Climate Change

## Message from the Guest Editor

Forests are declining in many parts of the world due to an increase in stress from drought, diseases, wildfire, storms, floods, urbanization, and land-use changes, among others. Trees are not only dying off in their natural habitats, such as forests, but they are also declining in artificial habitats such as in urban and periurban ecosystems. Trade-offs may also vary with time as forests pass through different stages of stand development. There is still a lack of studies on the understanding of the patterns, processes, and trends in trade-offs between management objectives and their relations to forest management interventions. In this issue, we aim to welcome contributions to trade-off assessments in forest management objectives from all over the world. We will be interested to see how proper interventions can reduce trade-offs in natural forests as well as built ecosystems.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
