

Special Issue

Sustainable Transformation of Regional Development and Landscape Management

Message from the Guest Editor

This Special Issue, “Sustainable Transformation of Regional Development and Landscape Management” in the journal *Sustainability* deals with the conceptualization, implementation and obstacles of sustainable development on a medium scale, regardless of whether the contexts are more urban or rural. Manuscripts that address the issues of sustainable transformation processes empirically, theoretically/conceptually, and also in terms of planning are welcome. Sustainable development is conceived in a broad understanding that not only refers to ecological structures and processes, but also includes economic, social, cultural, and political aspects. Concrete regional case studies are also welcome, in which the conceptions, implementations and obstacles of sustainable development are elaborated, whereby the conceptual classification is of particular importance here. Due to the complexity of the topic, researchers and research teams are also invited to submit a contribution to the Special Issue that illuminate the aforementioned topic area from an interdisciplinary or transdisciplinary perspective.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
