

Special Issue

A European Perspective on Cultural Heritage as a Driver for Sustainable Development and Regional Resilience

Message from the Guest Editors

Cultural heritage holds many tangible and intangible values for local communities and society in general. Particularly from a socioeconomic perspective, the presence of cultural heritage resources might serve to improve regional development through cultural tourism, event organization, the attraction of creative industries and other businesses, etc. However, notwithstanding the relative abundance of cultural heritage resources—in varying degrees of scope—there are substantial differences in the current application of culture-led development strategies across European regions. The Special Issue will therefore provide a state-of-the-art overview of contemporary cultural heritage management within Europe, providing theoretical contributions as well as practical toolkits and case studies. Contributions will help to frame cultural heritage as a resource for the creation of sustainable and resilient territories.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
