Special Issue

Regional Water System and Carbon Emission

Message from the Guest Editors

The water-energy-carbon nexus has become a hot topic in recent years. The operation of the regional water system involves water intake, water use, drainage, etc. The life cycle of water use and exploitation is accompanied by huge energy consumption and carbon emissions. Therefore, discovering the carbon emission characteristics of the water system on a regional scale from the perspective of the water-energy-carbon nexus is an urgent scientific problem. It is the basis for assessing the carbon emission of different links in the process of water system operation. Identifying the factors influencing carbon emissions and analyzing the carbon reduction potentials are of great theoretical significance for the low-carbon operation of the water system and could provide references enabling policymakers to follow reasonable strategies to save water and achieve a reduction in emissions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
