Renovation of Buildings and Modernization of Built Areas

Message from the Guest Editors

The construction of housing, public buildings and services, and technical and road infrastructure allows the needs of society to be met, while renovation of buildings and the modernization of built areas bring the living conditions of inhabitants to the level of modern civilization requirements. The point is, however, that all these investment and revitalization undertakings should always be rational and effective, as well as in line with public interest. We can achieve this goal both through investment activities in delimited new building areas and through comprehensive revitalization of existing buildings and the modernization of space. We encourage our contributors to prepare original manuscripts containing current research findings and scientific discoveries that study: Building renovation in sustainable building development; Revitalization of building stock; Renovation problems of residential buildings and historic buildings; Adaptation of buildings for utility purposes; Modernization of built areas; Building materials in historical buildings; Material, construction and execution issues in the field of renovation and restoration.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
