Conversion of Residual Biomass Energy to Power Generation

Message from the Guest Editors

Using biomass for energy production is becoming more and more attractive, especially in the electricity and transport sectors. Indeed, bioenergy represents a long-term measure to reduce the use of fossil fuels, decreasing at the same time greenhouse gas emissions and their contribution to climate change. This, together with the increasing cost of fossil fuels and the growing need for a secure energy source, has stressed the progress in biomass-based technologies, which are recognized as efficient, reliable, and environmentally friendly. In fact, unlike the other renewables, biomass can be stored and used to produce energy only when it is needed. Moreover, biomass is locally available, contributing to energy independence and regional social and economic development. Indeed, energy from biomass is the main source of renewable energy, with a share higher than 60%.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
