

## Special Issue

# Resilience, Sustainability and Voluntary Temporary Populations

### Message from the Guest Editors

Resilience represents one of the key contemporary challenges for local areas, particularly in rural and peripheral locations. Recent research shows that the resilience of places depends on ecological, economic, political, technological and social features specific to the context. The degree of community resilience, however, appears to vary depending on the adaptability of groups, institutions and individuals to prevent, prepare, recover and thrive in the event of hazards, crises and disasters, including COVID-19, as well as “normal” change. Much of the theorizing and research on the resilience and/or sustainability of places has been assumed on the basis of the permanent population and often does not give full recognition to the substantial role of “temporary”, “seasonal” or “mobile” populations, such as seasonal workers, students, second home owners, tourists, and fly-in/fly-out workers. Such temporary populations may be termed as voluntary so as to contrast them from forced migrant populations. ## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
