

Special Issue

Resilience and Recovery of Tourism

Message from the Guest Editors

This Special Issue aims to bring together different contributions of a multidisciplinary nature in which the emphasis is placed on the analysis of the special recovery capacity of the tourism sector, as well as trying to establish its response to this pandemic situation caused by COVID-19, to know if the behavior of the sector is analogous to what happened previously in other crises or to discern if the peculiarity of the health crisis provokes another differentiated response. In this case, the consumer's behavior, their motivations, interests, etc. play a fundamental role in the development of the theme. Has there been a change in the tourism model motivated by the pandemic? The way of doing tourism has changed: limited beaches, enjoyment of culture with less capacity, need to reserve in restaurants due to the reduction of places, etc. Has the response to this crisis been more sustainable tourism? Are these observed changes temporary or structural in the tourism model?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
