

# Topical Collection

## Designing More Diverse and Resilient Food Systems for the Future

### Message from the Collection Editors

The Topical Collection aims to include both empirical research articles and conceptual pieces covering (but not limited to) all stages of the agri-food system, from production to distribution, marketing and consumption, that may contribute to the transition towards a more diverse and resilient food system. Keywords

- food system
- supply chain
- agrobiodiversity
- sustainable consumption
- ecosystem services
- circular economy
- bioeconomy

---

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
