

Special Issue

Responsible and Sustainable Tourism Development

Message from the Guest Editors

The dominant tourism discourse on sustainability and responsibility (focus, practice, understood as appropriate action) calls for a solid understanding of the process of how a responsible destination actually implements a sustainable tourism agenda and development, which this special issue aims to provide based-on the ecological makings and theories called tourism ecology. Tourism and sustainable development have been a much studied and contested field of research. We are aware that the concept and interpretation of the development of tourism on sustainable, responsible and ecological basis—or in other words, ‘responsustainable tourism’ and ‘tourism ecology’—will be debated at least to the extent that landscape ecology was, back in the time. We look forward to have articles on any topic related to tourism development, sustainability, responsibility and ecology. Any interesting topics and themes are welcome connected with tourism responsibility and sustainability. There are no other strict thematic restrictions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
