

Special Issue

Risk, Resilience and Reliability Analysis for Sustainable Management

Message from the Guest Editors

This SI focuses on developing a collection of original research papers demonstrating the recent development of "Risk, Resilience and Reliability Analysis for Sustainable Management", and shed light on the challenges and future directions which the research community should focus on to develop more sustainable solutions in both engineering and social systems now and in the future. The topics may include, but are not limited to:

- Advances in risk, reliability, resilience analysis methods of sustainable systems;
- Risk, uncertainty, and sustainability management challenges in sociotechnical systems;
- Sustainability management of sociotechnical systems;
- Optimization and sustainable risk management;
- Decision and data analytics for risk assessment;
- Uncertainty analysis and sustainable operations management;
- Risk and reliability analysis of engineering systems in sustainable management;
- Probabilistic and deterministic approaches for modeling risk and reliability in sustainable operations;
- Artificial intelligence, reliability engineering, and sustainability of critical infrastructure.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
