

## Special Issue

# Road Safety and Better Mobility in Sustainable Urban Transport

### Message from the Guest Editors

Mobility patterns and lifestyles have changed in recent years in cities worldwide thanks to the rise in modes of travel commonly referred to as micro-mobility. It includes all transportation modes that allow users to make a hybrid usage and behave either as a pedestrian or as a vehicle at their convenience or when necessary. Defined as such, microvehicles include all easy-to-carry or easy-to-push vehicles allowing for the augmentation of the pedestrian.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
