

## Special Issue

# Road Traffic Engineering and Sustainable Transportation

### Message from the Guest Editors

This Special Issue will consist of papers describing the state of the art in road traffic engineering and sustainable transportation systems development areas. Activities in the field of road traffic engineering, including road traffic analysis and research, as well as the practical application of knowledge about road traffic in the planning, designing, and operation of transport systems and processes, contribute to ensuring sustainable transportation systems development. This is achieved by providing conditions for the safe, efficient, and economic transportation of people and goods that does not have a negative impact on the environment.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
