

Special Issue

Rural Population and Social Sustainability

Message from the Guest Editors

Dear Colleges, This Special Issue aims to encourage debate about the opportunities and conditions to re-equilibrate and revitalize the population in rural areas. As suggestions, some topics are highlighted: The ways to reconnect rural economies standing out the ability of rural populations to manage environmental sustainable practices; the lack of welfare conditions, the difficulties to access to services and social resources and their impact in terms of social sustainability; and the potential of the new ICTs and modes of transport (shared, collaborative) to support another kind of rural accessibility and the reduction of social inequalities in these areas. Although other proposals will be welcome, we appreciate contributions focusing on the former topics and about the capacity of social systems to regulate the imbalances that affect rural areas, as well as the participation of sociologists, geographers, environmentalists and specialists in rural planning. Prof. Dr. Luis Camarero
Prof. Dr. Jesús Oliva

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
