Special Issue

Sustainability in Rural Transformation and Development through the Lens of Human (Im)mobilities

Message from the Guest Editors

The following questions seem relevant when thinking about the future of rural areas: How can rural development achieve the target of sustainability? How vulnerable is sustainable rural development due to the expected effects of climate change? How far agriculture and, more specifically, family farming can maintain its balancing role in the countryside and/or reinforce its connections to sustainable rural development? Which are the new roles of internal/international migrants and the new stakeholders in addressing the sustainability goals for rural areas? This Special Issue will comprise a selection of papers presenting original and innovative contributions, based on quantitative, qualitative and/or geographical data, to the advancement of sustainability research in rural areas by examining the role of human (im)mobilities and new social actors/stakeholders for obtaining rural resilience, maintaining family farming, safeguarding the rural commons and increasing the attractiveness of rural regions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
