

Special Issue

Eco-Innovation Practices and Sustainable Business Performance

Message from the Guest Editors

Although the multi-disciplinary concept of ‘innovation’ has been debated in a wide range of contexts, recent calls for net-zero greenhouse gas solutions have meant ‘eco-innovation’—a relatively new topic and an essential ingredient that can help extend the frontiers of innovation research. There is a growing interest in understanding the interplay between eco-innovation practice and sustainable business performance. This Special Issue seeks to extend and offer novel insights relating to cross-cutting themes on eco-innovation and sustainable business performance in emerging markets. The call elicits cutting-edge research in sustainability, including, but not limited to:

- Eco-innovative practices and sustainability business performance;
- Eco-innovative practices and sustainability reporting/reports and disclosures;
- Eco-innovative practices, governance and sustainable growth/performance;
- Climate change and eco-innovation;
- Environmental performance and corporate governance;
- Green technology and business performance;
- Sustainable finance, energy efficiency and SME performance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
