

## Special Issue

# Decision-Making Methods and Applications for Sustainable Development of Characteristic Agriculture

### Message from the Guest Editors

Characteristic agriculture refers to agriculture with unique varieties, special qualities, and local characteristics, and it is developed for a specific region according to that region's unique conditions of geography, climate, and resources. Characteristic agriculture includes characteristic farming, forestry, animal husbandry, fishery, and even sideline production.

This Special Issue focuses primarily on the decision-making methods and applications for the sustainable development of characteristic agriculture. We are seeking papers on sustainable characteristic agriculture involving influence factors, sustainable solution alternatives, evaluation index systems, evaluation methods, risk identification, optimal allocation of resources, ecological safety, sustainable practice experience, management innovation, and so on. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
