

Special Issue

Sustainability in Fashion and Textiles: Can Environmental Impact Assessments Inform a Circular Fashion Future?

Message from the Guest Editors

This issue aims to address challenges regarding how environmental impact is measured and assessed across all phases of the fashion and textile product lifecycle from a multi-disciplinary perspective. It encourages critical evaluation of the reliability, authenticity, and usability of data across atmospheric, terrestrial, and aquatic environments. Exploring how existing methods of quantification could be having a detrimental effect on sustainable development across the sector, it aims to critically analyse existing tools, methods, and metrics to improve environmental impact assessment methodologies. Critically, it supports evidence-based scientific data to inform future innovation in the design and development of products, processes, and behaviours across a range of stakeholders. In this Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions.

- sustainable fashion and textiles: sustainable fashion and textile production and consumption
- environmental impact assessment
- lifecycle analysis (LCA)
- environmental degradation

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
