

## Special Issue

# Global Warming and Microbial Diversity, and the Challenge of Using Microbes to Go Carbon Neutral

### Message from the Guest Editor

If global warming continues to progress without effective action, the average temperature is expected to increase by up to 4.8°C compared to the year 2000. Since microbes are the final decomposers of organic materials and support the ecosystem, even the slightest change in microbial diversity can have a significant impact on the ecosystem. This understanding of microbial diversity in the past and present may allow us to predict the nature of future ecosystems.

Understanding how microbes adapt to climate changes will also enable us to understand the resilience of ecosystems. Furthermore, if microbes can contribute to carbon emission neutrality via the utilization of their abilities, they are expected to aid in the prevention of global warming. This Special Issue welcomes the submission of papers presenting original research and mini-reviews on microbial diversity, its relationship to climate change, and the use of microbes to achieve carbon neutrality.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
