

Special Issue

Strategies in Supply Chain Planning and Business Resilience

Message from the Guest Editors

Supply chain management and logistics have received increasing attention from both industries and academics, especially along with a series of incidents that affect worldwide industries such as Brexit, the trade war between US and China, COVID-19, the Suez Canal accident, increasing cyberattack incidents, etc. How can we sufficiently manage the supply chain and logistics? After the introduction of Logistics 4.0 and smart supply chain management, how do these advanced technologies assist businesses improve their performance? This Special Issue wishes to provide the interdisciplinary research insights business managements may turn to when innovating their processes, products, and services, thus gearing towards sustainable growth in the current era of a competitive marketplace. Authors are welcome to consider the topics listed below:

- Strategies for improving supply chain performance and logistics resilience;
- Sustainable/Innovative supply chain and logistics practices;
- Transportation and logistics business and management;
- Logistics 4.0 and smart supply chain management

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
