Special Issue

Slow Cities: Time and Spaces in Post-globalization. Economic, Social and Environmental Challenges

Message from the Guest Editors

It is commonly known that the rhythms of daily life have been accelerating at a steady rate in recent decades, creating an attitude that values time-saving over everything else. However, this way of interpreting reality is now beginning to show its limits and contradictions. the most evident manifestation of which is the emotional tension that accompanies economic and social behaviors, always perceived as inefficient with respect to the demands of quick living. The COVID-19 pandemic event has definitely further exasperated emotional experiences, imposing a critical analysis on accelerated models and an openness towards slow ones. In the age of speed, in which time never seems to be enough, the philosophy of "slowing down" has begun to emerge. It seems, thus, appropriate to redesign the relationship among people, technological innovations, and the built environment, recomposing their space-time distances in such a way that, while allowing freedom from physical obstacles and a great ability to move and act, it also allows people to find the right rhythm of life.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
