

Special Issue

SDN Networks for Modern Communication Systems

Message from the Guest Editors

This Special Issue will cover the broad range of research problems associated with SDN/NFV networks.

Researchers are invited to submit novel contributions in, but not limited to, the following topics:

- Structure of SDN networks to assist 5G systems
- Controller to controller communication
- Clustering of SDN networks
- Physical and logical implementation
- Controller placement and allocations problems
- System-level integration with 5G systems
- Traffic management of SDN based networks
- Performance optimization of SDN networks
- Performance evaluation of current existing SDN controllers
- Security issues/analysis of SDN networks
- NFV techniques, methods, innovations
- NFV/SDN to assist 5G network slicing
- AI algorithms for assisting SDN networks

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
