

## Special Issue

# Sustainable Development, Environment, and Health

### Message from the Guest Editor

Sustainable development, environment, and health are three most vital interrelated research areas in applied economics literature. The relationship among these three concepts is complex. To achieve their desired economic growth, countries are rapidly depleting limited natural resources. This excessive use of resources is causing complicated environmental problems such as global warming, environmental degradation, and health risks. On the other hand, achieving a certain level of economic growth is the topmost priority of many countries to enable them to use efficient technologies in order to improve environmental quality. A WHO (World Health Organisation) report notes that environmental factors are a main cause of notable burden of death, disease, and disability worldwide. Much of this disease can be prevented and many of these deaths can be avoided if effective policies are formulated and executed with moral commitment to sustainable development. This Special Issue will welcome research papers and reviews regarding these three concepts in order to improve environmental quality, population health, and ensure sustainable development.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
