Special Issue

Mitigating the Impacts of Climate Disasters on Environmental Sustainability

Message from the Guest Editor

In 2015, three global agendas were adopted by the member states of the United Nations (UN): the Sendai Framework for Disaster Risk Reduction 2015–2030 (SFDRR), the 2030 Agenda for Sustainable Development (SDGs), and the Paris Agreement. As is often pointed out, these three global agendas are mutually related. For instance, the United Nations Climate Change Secretariat (2017) illustrated that reducing vulnerability and enhancing resilience fall at the intersection of the three areas—disaster risk reduction (DRR), SDGs, and climate change adaptation (CCA).

Based on the global recognition indicated above, it is of great significance to mitigate the impacts of climate disasters in a holistic and transdisciplinary way, as has been requested by the three inter-related global agendas outlined above, namely the SFDRR, the SDGs, and the Paris Agreement. It is expected that this Special Issue will comprise valuable papers on different dimensions of DRR and CCA that focus on mitigating the impacts of climate disasters from the standpoint of environmental sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
