# Soil Fertility Improvement and Integrated Nutrient Management—a Pathway to Sustainable Agriculture

### Message from the Guest Editors

The emergence of new agricultural practices, fertilization methods, amendments, and plant nutrition sources, and the use of bacteria and fungi to improve the efficiency of nutrient use by crops, are all interesting and sustainable solutions for maintaining soil life, improving fertility, and feeding plants for sufficient and high-quality agricultural production to promote sustainable agriculture. To minimize contamination and environmental consequences, it is beneficial to valorize new and/or existing sources of fertilizers and soil improvers, either directly or indirectly. For this SI, authors are invited to publish articles on recent scientific progress and innovation in soil fertility and plant nutrition for sustainable agriculture. We welcome novel research, reviews, and opinion papers covering all related topics that enhance our understanding of new agricultural practices that maintain and/or restore soil life and fertility, new methods and technologies for mineral and organic feeding, plant fertilization, new sources of and processes for providing healthy food without negative impact on the soil, and the use of plant cover and/or crop associations.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
