

Special Issue

New Directions in Sustainable Organic Synthesis: The Role of Natural Raw Materials and Heterogeneous Catalysts

Message from the Guest Editors

This Special Issue focuses on modern methods of carrying out syntheses of organic compounds based on materials of plant origin and heterogeneous catalysts. Moreover, this Special Issue seeks to reveal possible directions of application for the compounds obtained using these methods. In this Special Issue, original research articles and reviews are welcome and research areas may include, but are not limited to:

- Processes of synthesis of organic compounds based on compounds of natural origin and heterogeneous catalysts;
- Obtaining raw materials of plant origin for organic syntheses;
- Materials of natural origin for applications as catalysts in organic syntheses;
- Modified materials of natural origin for use as catalysts in organic syntheses;
- Synthetic equivalents of materials of natural origin for use as catalysts in organic syntheses;
- Applications of products of catalytic transformations of natural compounds.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
