Sustainable Global Supply Chain Management: From an International Perspective

Message from the Guest Editors

In the last decade, sustainable supply chain management (SSCM) has become very pronounced topic and has received increasing attention from different communities. The implementation of SSCM is in line with the role of organizational factors in the adoption of economic, environmental, and social innovations. On the other hand, with the increasing globalization of markets and company operations, the relationships between the various agents in supply chains have become more important with suppliers and are crucial for the successful development of business. In fact, the growing interest in global supply chain management (GSC) has been strongly stimulated by the potential competitive advantages of a global market. Today, GSC forms a key pillar of the business strategy of companies that want to operate successfully in the foreign market. The academic and business community has a growing interest in studying how GSC and SSCM approaches can help improve the performance of companies that act or want to current in global markets...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
