

Special Issue

Advances in Industrial Engineering and Management Towards Sustainable Development Goals

Message from the Guest Editor

The Sustainable Development Goals (SDGs) are a collection of 17 global goals set by the United Nations General Assembly in 2015. Industrial engineering and management play a crucial role in achieving the Sustainable Development Goals (SDGs) through the optimization of processes, systems, and organizations. This Special Issue aims to bring together the latest research findings, case studies, and review articles that showcase the significant contributions of industrial engineering and management towards the SDGs. We welcome submissions that address innovative solutions, methodologies, and best practices that drive sustainable development in various sectors, including but not limited to manufacturing, service, healthcare, energy, and supply chain management. The following themes will be considered in this issue:

- Sustainable manufacturing processes;
- Sustainable transportation;
- Supply chain sustainability;
- Humanitarian Engineering;
- Healthcare systems and engineering;
- Energy management and policy;
- Circular economy practices;
- Sustainable decision-making;
- Social responsibility and ethics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
