

Special Issue

Sustainable Higher Education and Leadership

Message from the Guest Editor

Given its primary role as a knowledge producer, higher education can serve as a powerful means to help to create a more sustainable future through its academic mission. Universities and colleges can play a critical role in developing new systemic and transformative solutions through multistakeholder collaboration. However, as organizations that have stood for many centuries in some cases, the ability of higher education institutions to deliver on sustainability demands that they too adapt to this new global agenda for change... This Special Issue of *Sustainability* will focus on the role of leadership at all levels from the executive/administrative/board to the faculty and staff, students and alumni, and partners and stakeholders and regulators and governments, examining sustainability as a driver of change and transformation in higher education and beyond. Manuscripts can be illustrated by cases drawn from regional, national, and international levels.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
