

## Special Issue

# Soil Health Management for Ecological Sustainability in Agricultural Systems

### Message from the Guest Editor

Soil health is an integrative concept defined as the continued capacity of soil to function as a vital living ecosystem that sustains plants, animals, human and the environment. Sustainable agricultural ecosystems have the potential to provide ecological and environmental services that promote soil conservation, reduce greenhouse gas emissions and improve soil health. This approach is targeted towards minimal use of off-farm inputs with management practices that restore, maintain and enhance ecological harmony. Soil health management practices typically integrate the use of crop rotations, reduced tillage, cover crops and animal wastes to enhance soil fertility by fostering soil health and mitigating greenhouse gas emissions. This Special Issue intends to cover the state-of-the-art and recent progress in different aspects related to how specific soil health management practices like tillage intensity, amendment type and livestock integration impacts ecosystem services, specially carbon and nitrogen cycling....

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
