

## Special Issue

# Green Tourism Consumption and Sustainable Development

### Message from the Guest Editor

Green tourism consumption and sustainable development are important discourses as well as crucial areas of research in today's world. As the concern for environmental protection and sustainable practices grows, the tourism industry plays a significant role in promoting responsible travel behaviors and minimizing the negative impacts of traveling on natural resources. This Special Issue aims to collate cutting-edge research manuscripts on green tourism consumption and its implications for sustainable development. Papers that examine aspects such as green consumption preferences, environmentally responsible behavior, community engagement, and green innovation from a wide spectra of perspectives including tourists, tourism practitioners, residents in tourist destinations, and tourism businesses are welcome. Through this endeavor, we seek to contribute to the understanding of how tourism can be a catalyst for positive change. The subject of green tourism consumption aligns perfectly with the scope of our journal *Sustainability*, which focuses on promoting research on sustainable practices and their impact on global development.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
