Circular Economy in Small and Medium Enterprises

Message from the Guest Editors

The circular economy is a paradigm that aims to generate economic prosperity, protect the environment, and prevent pollution in order to facilitate sustainable development through creating and maintaining value in the economy, encouraging regenerative innovations, and closing the energy and material loops. Considering that linear business models predominate in firms, the transition to a circular system will require guidance and examples of successful cases for the benefits and advantages of the CE to become accepted and for the methods of application for sustainable production and consumption to become well known. This support is especially important in the case of SMEs, which have become highly important because they make up 95% of companies in the Organization for Economic Cooperation and Development (OECD) member countries (OECD, 2017). However, such organizations have to deal with technological, financial, and human resource barriers against circular economy implementation (Ormazabal et al., 2016; Rizos et al., 2016)...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
