

## Special Issue

# Sustainable Development in Small and Medium-sized Enterprises

### Message from the Guest Editors

Regionality is becoming a key factor in the current debate evolving around sufficiency: In order to be able to cope with global issues like climate change, large resource consumption, migration waves, social inequalities, and many more, regional solutions provided by small and medium-sized enterprises (SMEs) are called on alongside global ones. These solutions must include the requirements for a post-fossil future through environmental, climate, and resource conservation as well as the prospects for a fair and worthwhile individual and societal development in a late (or post-)growth society.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
