

## Special Issue

# Sustainable Measures and Strategies for Waste Prevention and Management

### Message from the Guest Editors

Waste generation is one of the most urgent problems that must be addressed to achieve sustainable development. Thus, waste management appears as a key topic to meet the Sustainable Development Goals (SDGs) adopted by the United Nations, being a central issue for sustainable production and consumption (SDG 12) and transversal to many others such as SDG 2 (by reducing food waste), SDG 11 (by improving waste management systems for healthy and resilient communities), or SDG 14 (by reducing plastic pollution in the ocean). Besides, the waste sector is a significant source of Greenhouse Gas emissions (mainly due to landfilling and dumping) and can play an important role to achieve SDG 13 on climate action. Hence, designing sustainable measures and strategies for waste prevention and management to reduce both the quantity and the negative impacts on society (environmental, economic, and social) is a major challenge that requires advanced tools, and reliable methods and frameworks to support the decision-making process.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
