

Special Issue

Improving Risk Management to Increase Sustainability in Project Management

Message from the Guest Editors

Sustainability seeks original manuscripts for a Special Issue on “Improving risk management to increase sustainability in project management” scheduled to appear in 2021, and with a deadline of November 30, 2021. Sustainability is a field of growing interest in Project Management (PM). Literature is abundant and approaches Sustainability in Project Management from different perspectives all of them becoming a priority nowadays. According to the moment we are living, risk management has become a must. The COVID19 pandemic we are going through is a clear example of how uncertainty may affect project results. But uncertainty also can stimulate project management research toward new opportunities and innovations. With this Special Issue, we want to highlight how uncertainty may also encourage the increase of sustainability in project management. Therefore, we particularly welcome papers that help to clarify the link between risk management and sustainability in projects.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
