

Special Issue

The Spatial Planning of Rural Areas

Message from the Guest Editors

The proliferation of buildings in rural areas, involving the use of architectural typologies far removed from traditional models, has brought about a loss of landscape values in these spaces. Integrating these buildings appropriately in the landscape is an essential step towards preserving landscape quality in rural areas, while it also implies having available an essential tool for rural development policies. In many cases, the legislation is a step behind. Planners need objective tools which allow regulation of the sustainable use of these landscapes, while simultaneously permitting local and economic development. New GIS technologies, 3D visualization tools for the simulation of scenarios, and surveys of public participation, among others, are some of the research techniques placed at the service of this purpose. Projects related to these methodologies and techniques, as well as practical cases of application, will be of interest in this Special Issue for policymakers, planners, landowners, and stakeholders.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
