# **Special Issue**

# Sustainable Supply Chain Management and Optimization

### Message from the Guest Editors

The topics of the Special Issue "Sustainable Supply Chain Management and Optimization" to be discussed will include identifying management factors for sustainable supply chain development in order to promote innovative development of sustainable supply chain systems, such as carbon footprint and emissions, waste, air pollution, big data, cost management, agricultural supply chain, and supply-chain finance. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Supply chain management based on big data;
- Research on supply chain decisions under disturbance:
- Research on the supply chain from the perspective of game theory;
- Supply chain management in uncertain environments;
- Research on supply chain development under the influence of policy;
- Research on green supply chain under low carbon economy;
- Logistics and environmental protection in the supply chain.

We look forward to receiving your contributions.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
